=> get all product data

The screenshot shows a VS Code editor with the following components:

- EXPLORER:** A file tree on the left showing a project structure. The file `JS db-test.js` is selected.
- EDITOR:** The main workspace showing the content of `JS db-test.js`. The code is as follows:

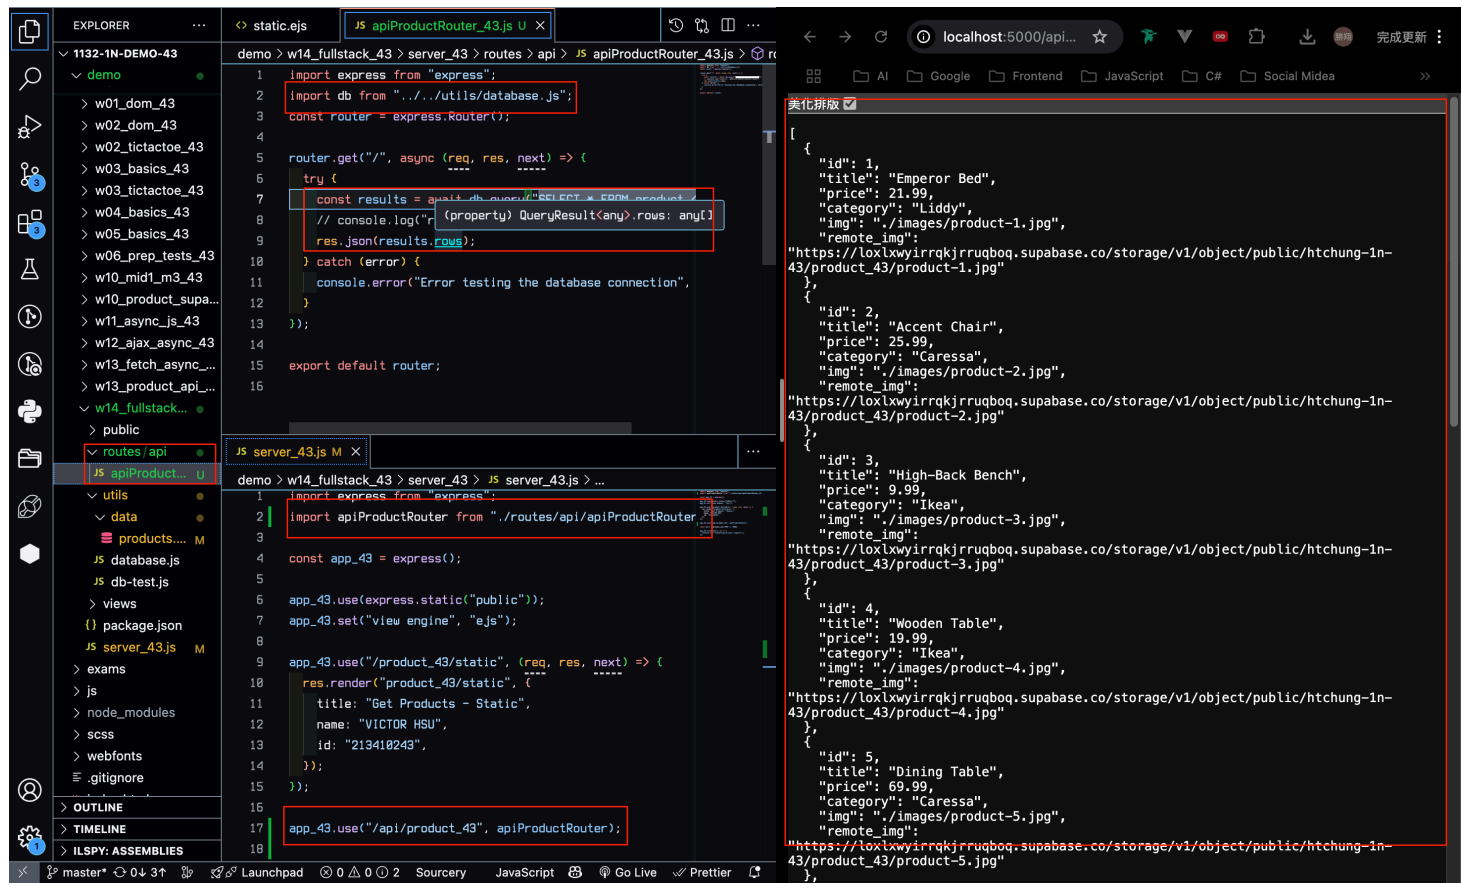

```
1 import db from './database.js';
2
3 const testDB = async () => {
4   try {
5     const res = await db.query("SELECT * FROM product_43");
6     console.log("res", JSON.stringify(res.rows));
7   } catch (error) {
8     console.error(error);
9   }
10 };
11
12 testDB();
13
```
- TERMINAL:** The bottom panel showing the execution of the code. The command `npm run server_43:db:test` has been run, and the output is a JSON array of 12 product objects. The first few objects are:
